\$SuperBorder\$

\$SuperBorder\$ is the brand name for specially benchmarked, high performing Border Leicester rams, that are individually ranked by Lambplan as above average for the breed.

The Border Leicester Cross Index is modelled on a production system using sires crossed to Merino dams, producing first cross progeny. The index identifies high early growth animals with a significant response in post weaning weight and maternal ability. It also aims for an improvement in carcass eye muscle depth and number of lambs weaned. There is a small improvement in fleece weights. The index also recognises the importance of maintaining adult weight over time. The BLX index is set at 117.3 for 2019, not all rams are \$SuperBorder\$, but we present all of the rams in the catalogue as our quality selections for 2019.

We will continue to identify and use superior genetics in our breeding program, to produce structurally correct and stylish, well balanced rams, with an attractive fleece of wool, and a balanced set of performance figures. We strive to produce a profitable package, to give sheep producers the opportunity to achieve the best outcome from their individual sheep enterprise.

Percentile report for Maternal 1st cross sire breeds (Border Leicesters) dated 15/08/2019 for 2018 drop animals.
